MRI Machine Details

FONAR UPRIGHT® WEIGHT-BEARING MRI

The UPRIGHT® MRI is the only MRI scanner than can scan patients in any position, including sitting, standing, bending (for flexion and extension) or lying down.

- Rotates patients from recumbent to upright
- Comparative scans in both Upright and Recumbent positions
- Flexion, Extension, Standing, Sitting and Lateral Bending positions
- Scans patients in their position of symptoms
- Ideal for anxious and claustrophobic patients
- The only choice for patients that cannot lie down
- Water-cooled 0.6 Tesla iron-frame electromagnet
